Subject: court rule no.2003-47

In response to rule no.2003-47.

I am a victim of asbestos and before you try to change the law I would like to let you know what I have to live with first. When I wake up in the mornings 75% of the time I cough up phlem from my lungs. The other 25% I will wake up in the middle of the night with a real bad headache. When that happens I have to take a hot shower then set up until the phlem drains from my sinus. I can no longer even walk fast because it is to hard to breath. Also when it gets to cold out side I can't stay out more then about 15 minutes because my chest hurts to much. You want to make it so I have to have canser before I can recieve anything. Is'nt that a little late. If you don't think so then maybe you should get rid of your armed guards in the court room. After all they're there just in case someone might shoot you and I don't think anyone would want your job then.

Thank You
William Baumia
